Swagger Petstore (1.0.7)

Operations

Run All Operations

All 20 operations will be included.

Options

☐ Include negative tests (invalid input)

☐ Include auth tests (missing/invalid credentials)

☐ Include boundary tests (edge-case params)

Framework

Jest + Axios

Generate Tests

```
1 import axios from 'axios';
2 /**
3  * Generated Axios + Jest tests for spec: Swagger Petstore
4  * Generated at: 2026-07-12T08:09:56.499Z
5  */
6
7 const baseUrl = process.env.API_BASE_URL || 'http://localhost:3000';
8
9 describe('POST /pet/{petId}/uploadImage', () => {
10   it('returns the expected success response', async () => {
11     const pathParams = {
12       'petId': 1
13     };
14     const response = await axios.request({
15       method: 'POST',
16       url: `${baseUrl}/pet/${pathParams.petId || "123"}/uploadImage`,
17       headers: { 'Content-Type': 'application/json' },
18     });
19     expect(response.status).toBe(200);
20   });
21 });
22
23
24 describe('POST /pet', () => {
25   it('returns the expected success response', async () => {
26     const requestData = {
27       "id": 1,
```
