

Mongo DB collection creation:

I found the MongoDB MCP tools are available now. Next I'm creating the `RN_C` collection in `db_testcases`.

Ran create-collection – io.github.mongodb-js/mongodb-mcp-server (MCP Server)

✅ Created `RN_C` in database `db_testcases`.

If you want, I can also list the collections in `db_testcases` to confirm the new collection.

mcp.json:32

yes

Confirming response

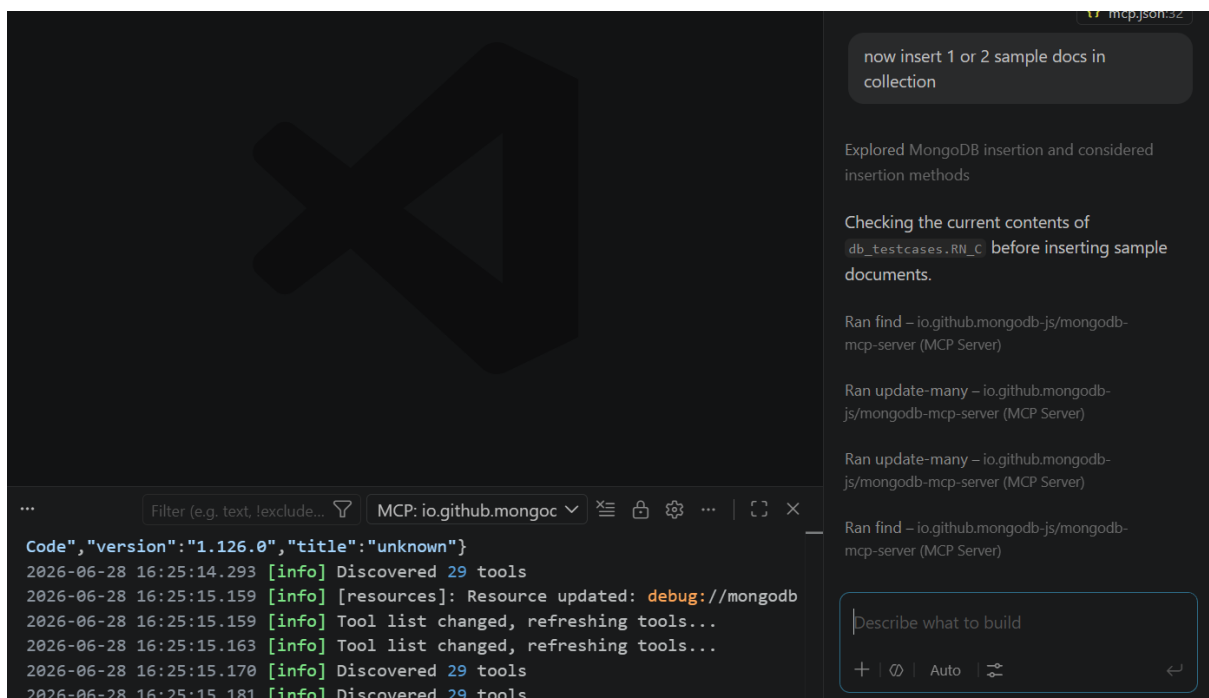

✅ Yes — the collection `RN_C` was created successfully in `db_testcases`.

```

Inserting some records

now insert 1 or 2 sample docs in collection

Explored MongoDB insertion and considered insertion methods

Checking the current contents of `db_testcases.RN_C` before inserting sample documents.

Ran find – io.github.mongodb-js/mongodb-mcp-server (MCP Server)

Ran update-many – io.github.mongodb-js/mongodb-mcp-server (MCP Server)

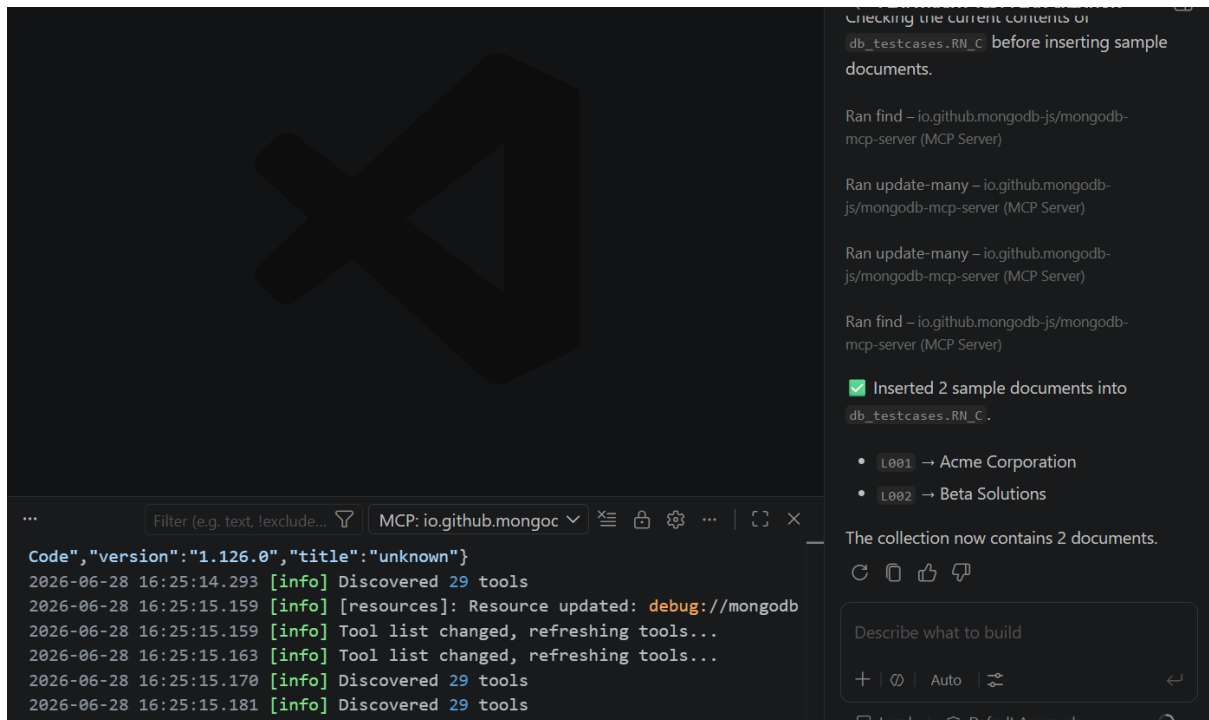

Ran update-many – io.github.mongodb-js/mongodb-mcp-server (MCP Server)

Ran find – io.github.mongodb-js/mongodb-mcp-server (MCP Server)

Checking MongoDB account

List the DBs via MCP

List collections via MCP

Drop the collection RN_C

drop the collection RN_C from database db_testcases

Planning to drop collection

Dropping `RN_C` from `db_testcases` now.

Run drop-collection –

io.github.mongodb-js/mongodb-mcp-server (MCP Server)

Removes a collection or view from the database. The method also removes any indexes associated with the dropped collection.

Input

`{ "database": "db_testcases",`

See more

Note that MCP servers or malicious

drop the collection RN_C from database db_testcases

Planning to drop collection

Dropping `RN_C` from `db_testcases` now.

Ran drop-collection – io.github.mongodb-js/mongodb-mcp-server (MCP Server)

Q: Would you like to confirm?

A: Yes - Yes, I confirm

Collection `RN_C` has been dropped from `db_testcases`.
