

Week 3 Day 1 Assignment:

Task: Implement playwright/typescript with vibe coding

Vibe coding prompt:

Analyse my existing code base for selenium with java implementation

Instruction:

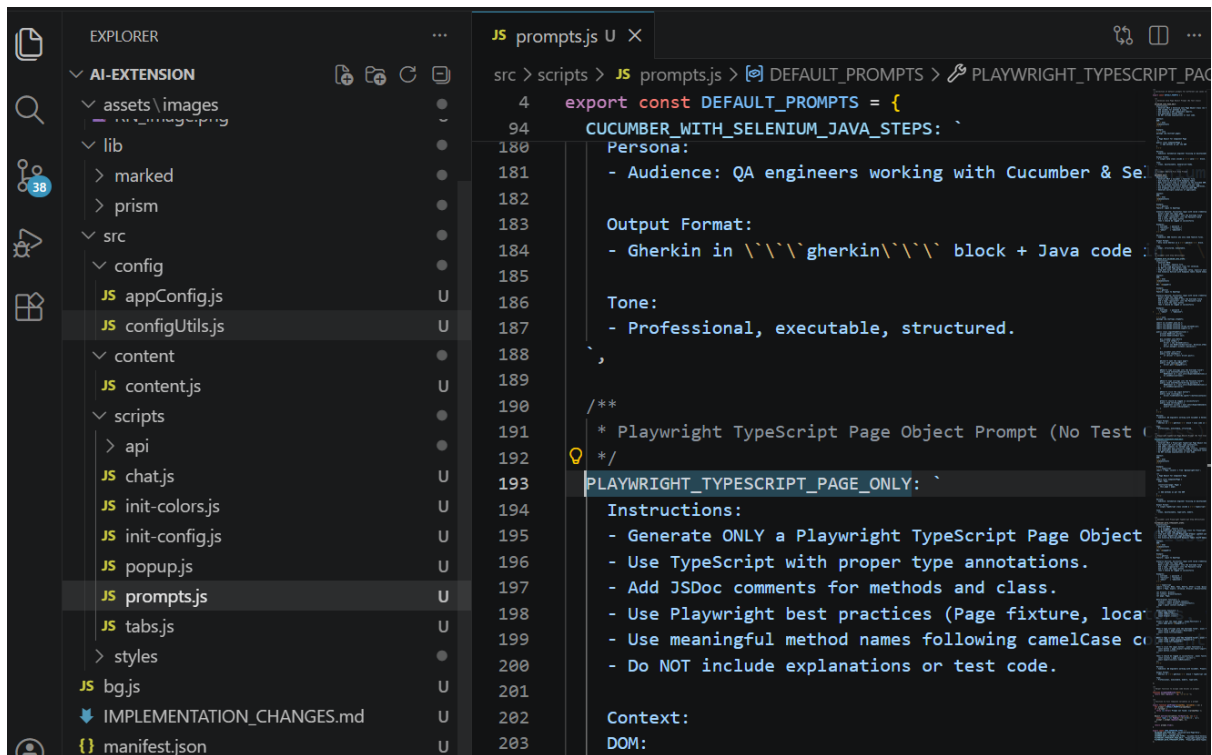

[STRICT] GO STEP BY STEP. Once I approve, proceed with next step

[MANDATORY] Find code logic to generate the feature file and the page class with Selenium and JAVA

[IMPORTANT] List the files in which implementation is done for Selenium with JAVA

[CRITICAL] Implement code logic to generate the feature file and the page class with Playwright and Typescript

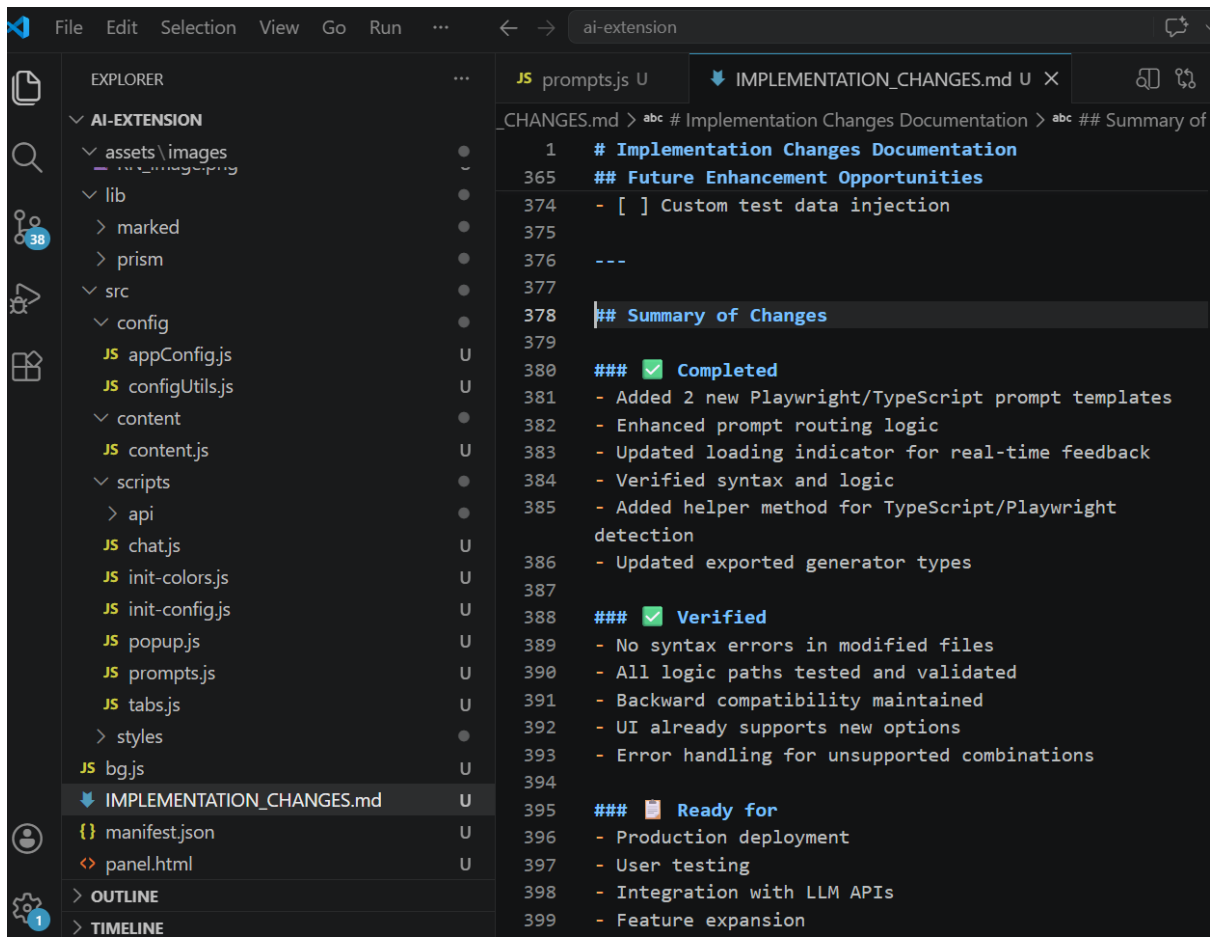

[CRITICAL] List the files in which implementation is done for Playwright with Typescript

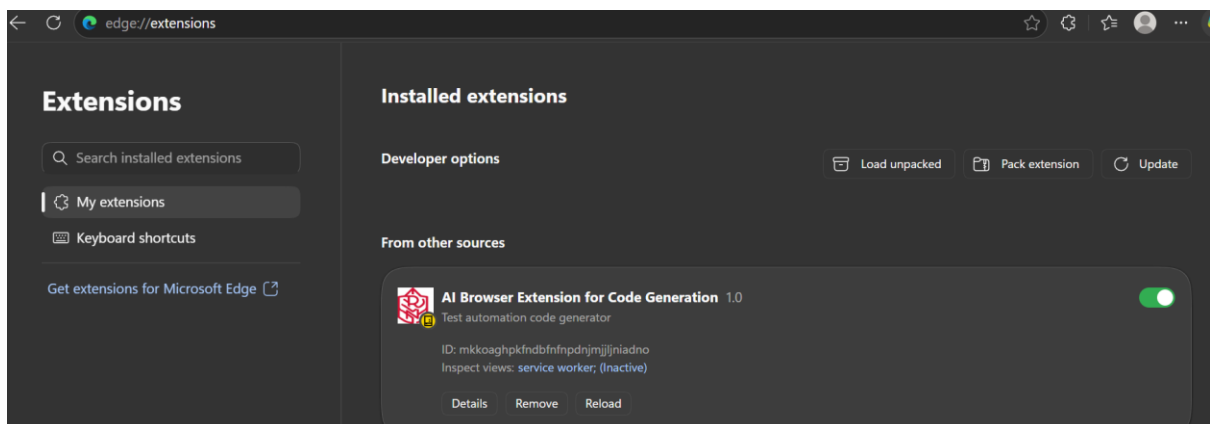

```
src > scripts > JS prompts.js > [X] DEFAULT_PROMPTS > [X] PLAYWRIGHT_TYPESCRIPT_PAGE_ONLY

4 export const DEFAULT_PROMPTS = {
94   CUCUMBER_WITH_SELENIUM_JAVA_STEPS: `
180     Persona:
181     - Audience: QA engineers working with Cucumber & Selenium
182
183     Output Format:
184     - Gherkin in \`\`\`gherkin\`\`\` block + Java code :
185
186     Tone:
187     - Professional, executable, structured.
188   },
189
190   /**
191    * Playwright TypeScript Page Object Prompt (No Test Code)
192    */
193   PLAYWRIGHT_TYPESCRIPT_PAGE_ONLY: `
194     Instructions:
195     - Generate ONLY a Playwright TypeScript Page Object
196     - Use TypeScript with proper type annotations.
197     - Add JSDoc comments for methods and class.
198     - Use Playwright best practices (Page fixture, locators, etc.)
199     - Use meaningful method names following camelCase convention.
200     - Do NOT include explanations or test code.
201
202     Context:
203     DOM:
```

[.md file created for the Implementation changes](#)

With this instruction with copilot, the required changes have been done and saved the extension. Logo has been modified and testing it.

☒ Feature File ☒ Page Class

C Reset Chat

```
When('I select {string} from the Country '
const dropdown = page.locator('#createL
await dropdown.selectOption({ label: co
});

When('I click the Create Lead button', as
const button = page.locator('input[name
await button.click();
});

Then('I should see the lead created succe
const success = page.locator('formSect
await expect(success).toBeVisible();
});
```

Feature: Create Lead

Scenario Outline: Successful creation of a lead with valid details

Given I open the create lead page

When I type "<companyName>" into the Company Name field

And I type "<firstName>" into the First name field

And I type "<lastName>" into the Last name field

And I select "<source>" from the Source dropdown

And I select "<marketingCampaign>" from the Marketing Campaign dropdown

And I type "<phoneNumber>" into the Phone Number field

And I type "<email>" into the E-Mail Address field

And I type "<address1>" into the Address Line 1 field

And I type "<address2>" into the Address Line 2 field

And I type "<city>" into the City field

And I select "<state>" from the State/Province dropdown

And I type "<zip>" into the Zip/Postal Code field

And I select "<country>" from the Country dropdown

And I click the Create Lead button

Then I should see the lead created successfully

Examples:

companyName	firstName	lastName	source	marketingCampaign	phoneNumber	email	address1	address2	city	state	zip	country
-------------	-----------	----------	--------	-------------------	-------------	-------	----------	----------	------	-------	-----	---------

Test Company	John	Doe	Cold Call	Affiliate Sites	1234567890	test@example.com	Test Street	Apt 101
Chennai	Tamil Nadu	600001	India					

QA Company	Jane	Doe	Conference	Automobile	9876543210	qa@example.com	QA Street	Apt 202	Bangalore	Karnataka	560001	India
------------	------	-----	------------	------------	------------	----------------	-----------	---------	-----------	-----------	--------	-------
