

With the provided code TC generation is working fine.

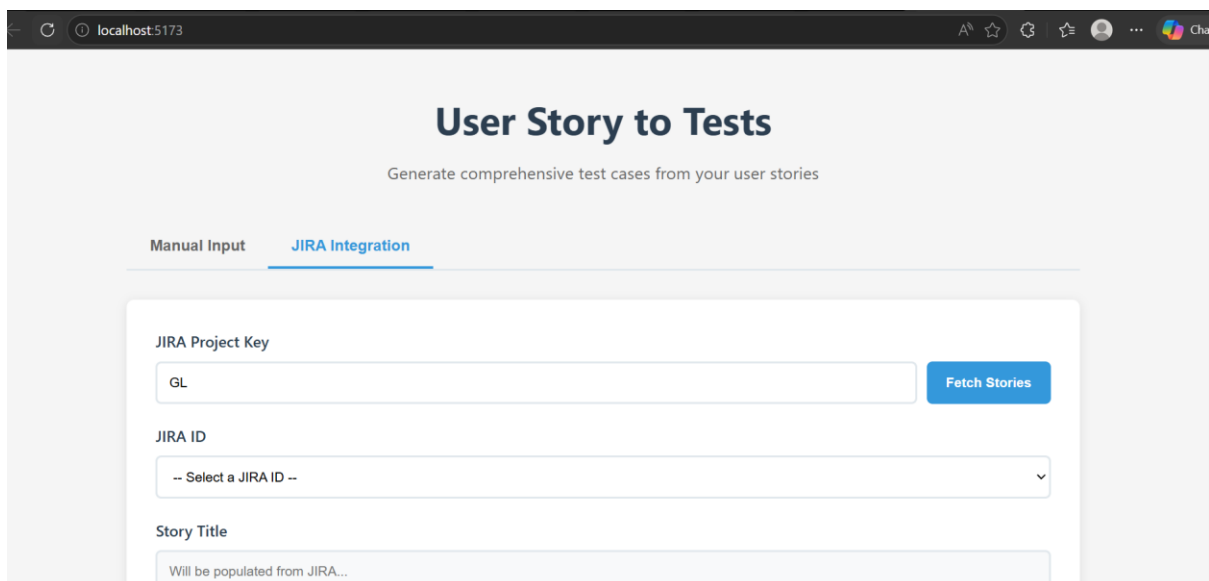

Home Assignment

With vibe coding implement the below

- 1)Connect to jira via api
- 2)Fetch the user storie from jira to generate testcases

Implemented JIRA connectivity

localhost:5173

-- Select a JIRA ID --

Story Title

Will be populated from JIRA...

Description

Will be populated from JIRA...

Acceptance Criteria

Will be populated from JIRA...

Additional Info

Enter additional info (optional)...

Now selecting a user story

localhost:5173

GL-20 (To Do)

Story Title

Doctor Dashboard Op Dashboard

Description

As a user, I want to doctor dashboard op dashboard so that the related functionality works as expected.

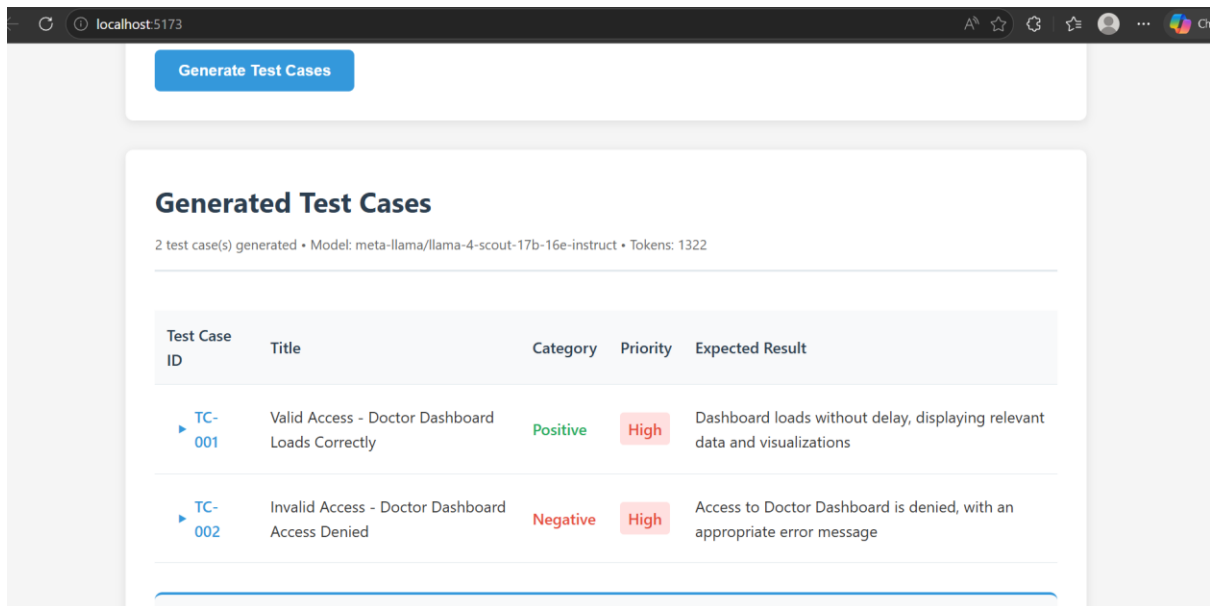

Acceptance Criteria

Given a user with valid access, when they open the dashboard, then relevant data and visualizations should be displayed correctly without delay.

Additional Info

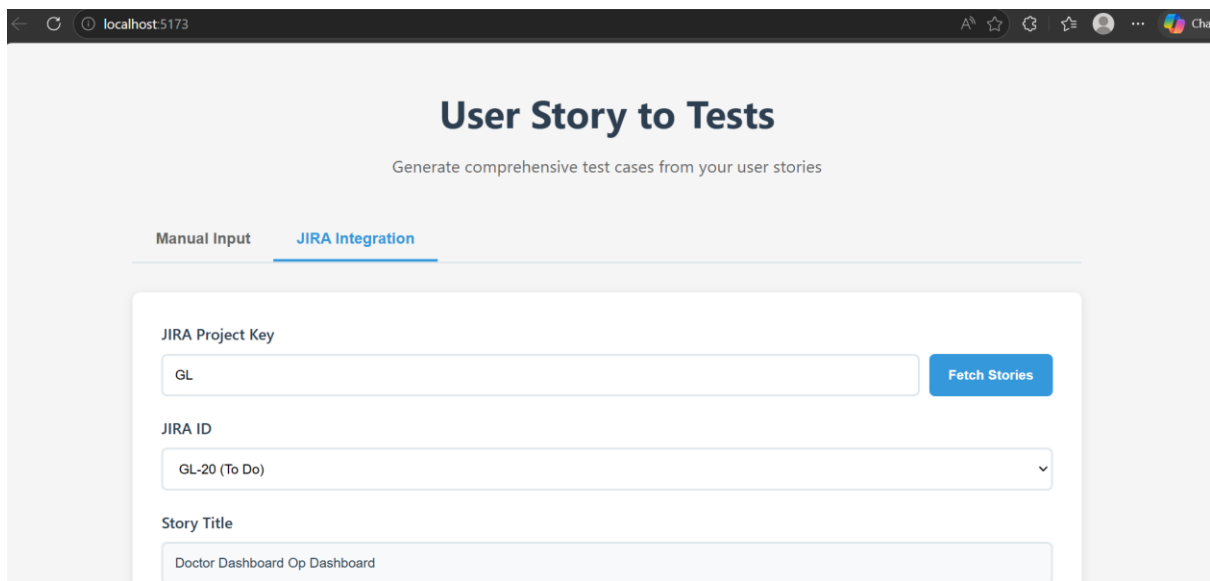

Enter additional info (optional)...

Generate TC

TC got generated successfully.

Now verifying the older way by manually providing user story info and generating the TC

Moving to manual input tab

localhost:5173Generate comprehensive test cases from your user stories

Manual InputJIRA Integration

Story Title *

As a doctor, I want an automated prescription verification system so that I can review, approve, or modify prescriptions digitally before they are sei

Description

The system should enable doctors to view medication details prescribed by other physicians or generated automatically from patient diagnosis. It should allow verification of dosage, potential interactions, and duplicate drugs. Once verified, prescriptions should automatically sync with the pharmacy module for patient dispensing.

Acceptance Criteria *

When the doctor reviews it,
Then the system should highlight issues and provide AI-based recommendations for correction.

Given a verified prescription,
When it is approved,
Then it should automatically update the pharmacy dispensing queue.

Generate TC

localhost:5173

Generate Test Cases

Generated Test Cases

2 test case(s) generated • Model: meta-llama/llama-4-scout-17b-16e-instruct • Tokens: 1589

Test Case ID	Title	Category	Priority	Expected Result
▶ TC-001	Verify and Approve a Prescription with No Errors	Positive	High	Prescription approved and updated in pharmacy dispensing queue
▶ TC-002	Verify and Correct a Prescription with Errors	Negative	High	Prescription corrected, approved and updated in pharmacy dispensing queue
